### Legend

- P = Pepeekeo type soil  
(Figures denote depth of boring from natural ground surface.)
- G = Gravel mixed with yellowish clay
- D = Decomposed or mud rock

### Note!!

In practically all cases, where they are shown, the decomposed rock or gravel is overlain by P or Pepeekeo soil. The data on this sheet is not intended to show thickness of hard layers such as decomposed rock.

### Notice to contractor!

The data shown on this soil profile sheet is intended primarily for the convenience of the Engineer in the control of earthwork. The borings were carefully made and are believed to be reliable but the Engineer does not guarantee the accuracy of same. The contractor is hereby advised and will be presumed to have made his own investigations on the site prior to submission of his bid.
