

Amend **Section 206 - Excavation and Backfill for Conduits and Structures** to read as follows:

**"SECTION 206 - EXCAVATION AND BACKFILL
FOR CONDUITS AND STRUCTURES**

206.01 Description. This section is for excavation and backfilling trenches for ductlines.

206.02 Materials. Materials shall conform to the following:

Trench Backfill Material 703.21

The Contractor may use Section 313 - Controlled Low Strength Material (CLSM) in place of trench and structure backfill material subject to the Engineer's acceptance. Do not use CLSM as trench backfill when installing aluminum and aluminum coated pipe culverts. When using CLSM, the Engineer will consider CLSM as the required backfill.

206.03 Construction Requirements.

(A) General. Notify the Engineer 10 working days before trenching for ductlines.

When the material from excavation does not meet the quality requirements specified for the backfill, furnish such suitable material as required.

206.04 Method of Measurement.

(A) Ductline Trenching. The Engineer will not measure trenching for ductlines.

(B) Trench Backfill. The Engineer will not measure backfill of trenches for ductlines.

206.05 Basis of Payment.

(A) Ductline Trenching. The Engineer will not pay for the trenching separately. The Engineer will consider the cost for trenching as included in the contract price for installing the ductline.

(B) Trench Backfill. The Engineer will not pay for trench backfill separately. The Engineer will consider the cost for backfill as included in the contract price for installing the ductline."
