12	GENERATOR SHED

May 1971
State purchasing Timing devices
4 some PVC piping to connect to
Nail Guard Water line under
" Project BD67-713 Phase I-A"

3/12/71 Project BD67-713 was too costly for available appropriations, hence was split into phases. Project BD67-713 Phase I was for initial work on auto drag strips primarily. Keep this set of drawings as it shows what ultimate development of the Cleveland Complex will be. Other phases will be constructed as funds become available.
