"108 – PROSECUTION AND PROGRESS

4 5

6

7

8

108.01 Notice to Proceed (NTP). A Notice To Proceed will be issued to the Contractor not more 30 days after the contract certification date. The Engineer may suspend the contract before issuing the Notice To Proceed, in which case the Contractor's remedies are exclusively those set forth in Subsection 108.10 -Suspension of Work.

9 10 11

12

13

14

15

The Contractor shall be allowed up to 60 calendar days after the Notice to Proceed to begin physical work. The Start Work Date will be established when this period ends or on the actual day that physical work begins, whichever is first. Charging of Contract Time will begin on the Start Work Date. The Contractor shall notify the Engineer, in writing, at least five working days before beginning physical work.

16 17 18

19

In the event that the Contractor fails to start physical work within the time specified, the Engineer may terminate the contract in accordance with Subsection 108.11 – Termination of Contract for Cause.

20 21 22

23

24 25

26

27

During the period between the Notice to Proceed and the Start Work Date the Contractor should adjust work forces, equipment, schedules, and procure materials and required permits, prior to beginning physical work.

Any physical work done prior to the Start Work Date will be considered unauthorized work. If the Engineer does not direct that the unauthorized work be removed, it shall be paid for after the Start Work Date and only if it is acceptable.

28 29

30 31

32

In the event that the Engineer establishes, in writing, a Start Work Date that is beyond 60 calendar days from the Notice to Proceed date, the Contractor may submit a claim in accordance with, Subsection 107.15 - Disputes and Claims for increased labor and material costs which are directly attributable to the delay beyond the first 60 calendar days after the NTP date.

33 34 35

36

37

The Contractor shall notify the Engineer at least 24 hours before restarting physical work after a suspension of work pursuant to Subsection 108.10 -Suspension of Work.

38 39

40

41

Once physical work has begun, the Contractor shall work expeditiously and pursue the work diligently to completion with the contract time. If a portion of the work is to be done in stages, the Contractor shall leave the area safe and usable for the user agency and the public at the end of each stage.

42 43 44

45

46

108.02 Prosecution of Work. Unless otherwise permitted by the Engineer, in writing, the Contractor shall not commence with physical construction unless sufficient materials and equipment are available for either continuous construction or completion of a specified portion of the work.

(1) List of the Superintendent and other Supervisory Personnel, and their contact information.

(2) Name of person(s) authorized to sign for the Contractor.

(3) Work Schedule including hours of operation.

(4) Initial Progress Schedule (See Subsection 108.06 – Progress Schedule).

(5) Water Pollution and Siltation Control Submittals, including Site-Specific Best Management Practice Plan.

(6) Solid Waste Disposal form.

(7) Tax Rates.

(8) Insurance Rates.

(9) Certificate of Insurance, satisfactory to the Engineer, indicating that the Contractor has in place all insurance coverage required by the contract documents.

(10) Schedule of agreed prices.

(11) List of suppliers.

(12) Traffic Control Plan, if applicable.

108.04 Character and Proficiency of Workers. The Contractor shall at all times provide adequate supervision and sufficient labor and equipment for prosecuting the work to full completion in the manner and within the time required by the contract. The superintendent and all other representatives of the Contractor shall act in a civil and honest manner in all dealings with the Engineer, all other State officials and representatives, and the public, in connection with the work.

All workers shall possess the proper license, certification, job classification, skill, training, and experience necessary to properly perform the work assigned to them.

The Engineer may direct the removal of any worker(s) who does not carry out the assigned work in a proper and skillful manner or who is disrespectful, intemperate, violent, or disorderly. The worker shall be removed forthwith by the Contractor and will not work again without the written permission of the Engineer.

108.05 Contract Time.

(A) Calculation of Contract Time. When the contract time is on a working day basis, the total contract time allowed for the performance of the work will be the number of working days shown in the contract plus any additional working days authorized in writing as provided hereinafter. The count of elapsed working days to be charged against contract time, will begin from the Start Work Date and will continue consecutively to the date of Substantial Completion. When multiple shifts are used to perform the work, the State will not consider the hours worked over the normal eight working hours per day or night as an additional working day.

 When the contract is on a calendar day basis, the total contract time allowed for the performance of the work will be the number of days shown in the contract plus any additional days authorized in writing as provided hereinafter. The count of elapsed days to be charged against contract time will begin from the Start Work Date and will continue consecutively to the date of Substantial Completion. The Engineer will exclude days elapsing between the orders of the Engineer to suspend work and resume work for suspensions not the fault of the Contractor.

(B) Modifications of Contract Time. Whenever the Contractor believes that an extension of contract time is justified, the Contractor shall serve written notice on the Engineer not more than five working days after the occurrence of the event that causes a delay or justifies a contract time extension. Contract time may be adjusted for the following reasons or events, but only if and to the extent the critical path has been affected:

(1) Changes in the Work, Additional Work, and Delays Caused by the State. If the Contractor believes that an extension of time is justified on account of any act or omission by the State, and is not adequately provided for in a field order or change order, it must request the additional time as provided above. At the request of the Engineer, the Contractor must show how the critical path will be affected and must also support the time extension request with schedules, as well as statements from its subcontractors, suppliers, or manufacturers, as necessary.

190 191

Claims for compensation for any altered or additional work will be determined pursuant to Subsection 104.02 – Changes.

Additional time to perform the extra work will be added to the time allowed in the contract without regard to the date the change directive was issued, even if the contract completion date has passed. A change requiring time issued after contract time has expired will not constitute an excusal or waiver of pre-existing Contractor delay.

- (2) Delay for Permits. For delays in the routine application and processing time required to obtain necessary permits, including permits to be obtained from State agencies, the Engineer may grant an extension provided that the permit takes longer than 30 days to acquire and the delay is not caused by the Contractor, and provided that as soon as the delay occurs, the Contractor notifies the Engineer in writing that the permits are not available. Permits required by the contract that take less than 30 days to acquire from the time which the appropriate documents are granted shall be acquired between Notice to Proceed and Start Work Date or accounted for in the contractor's progress schedule. Time extensions will be the exclusive relief granted on account of such delays.
- (3) Delays Beyond Contractor's Control. For delays caused by acts of God, a public enemy, fire, inclement weather days or adverse conditions resulting therefrom, earthquakes, floods, epidemics, quarantine restrictions, labor disputes impacting the Contractor or the State, freight embargoes and other reasons beyond the Contractor's control, the Contractor may be granted an extension of time provided that:
 - (a) In the written notice of delay to the Engineer, the Contractor describes possible effects on the completion date of the contract. The description of delays shall:
 - 1. State specifically the reason or reasons for the delay and fully explain in a detailed chronology how the delay affects the critical path.
 - **2.** Include copies of pertinent documentation to support the time extension request.
 - **3.** Cite the anticipated period of delay and the time extension requested.
 - **4.** State either that the above circumstances have been cleared and normal working conditions restored

ER-16(003)

192	as of a certain day or that the above circumstances
193	will continue to prevent completion of the project.
194	
195	(b) The Contractor shall notify the Engineer in writing
196	when the delay ends. Time extensions will be the
197	exclusive relief granted and no additional compensation will
198	be paid the Contractor for such delays.
199	
200	(4) Delays in Delivery of Materials or Equipment. For
201	delays in delivery of materials or equipment, which occur as a
202	result of unforeseeable causes beyond the control and without fault
203	of the Contractor, its subcontractor(s) or supplier(s), time
204	extensions shall be the exclusive relief granted and no additional
205	compensation will be paid the Contractor on account of such delay.
206	The delay shall not exceed the difference between the originally
207	scheduled delivery date and the actual delivery date. The
208	Contractor may be granted an extension of time provided that it
209	complies with the following procedures:
210	
211	(a) The Contractor's written notice to the Engineer must
212	describe the delays and state the effect such delays may
213	have on the critical path.
214	
215	(b) The Contractor, if requested, must submit to the
216	Engineer within five days after a firm delivery date for the
217	material and equipment is established, a written statement
218	regarding the delay. The Contractor must justify the delay
219	as follows:
220	
221	1. State specifically all reasons for the delay.
222	Explain in a detailed chronology the effect of the delay
223	on the critical path.
224	·
225	2. Submit copies of purchase order(s), factory
226	invoice(s), bill(s) of lading, shipping manifest(s),
227	delivery tag(s), and any other documents to support
228	the time extension request.
229	·
230	3. Cite the start and end date of the delay and the
231	time extension requested.
232	
233	(5) Delays for Suspension of Work. When the performance
234	of the work is totally suspended for one or more days (calendar or
235	working days, as appropriate) by order of the Engineer in
236	accordance with Subsections 108.10(A)(1), 108.10(A)(2), or
237	108.10(A)(5) the number of days from the effective date of the
238	Engineer's order to suspend operations to the effective date of the
239	Engineer's order to resume operations shall not be counted as

243

contract time and the contract completion date will be adjusted. During periods of partial suspensions of the work, the Contractor will be granted a time extension only if the partial suspension affects the critical path. If the Contractor believes that an extension of time is justified for a partial suspension of work, it must request the extension in writing at least five working days before the partial suspension will affect the critical operation(s) in progress. The Contractor must show how the critical path was increased based on the status of the work and must also support its claim if requested, with statements from its subcontractors. A suspension of work will not constitute a waiver of pre-existing Contractor delay.

- (6) Contractor Caused Delays. No time extension will be granted under the following circumstances:
 - (a) Delays within the Contractor's control in performing the work caused by the Contractor, subcontractor, supplier, or any combination thereof.
 - **(b)** Delays within the Contractor's control in arrival of materials and equipment caused by the Contractor, subcontractor, supplier, or any combination thereof, in ordering, fabricating, and delivery.
 - (c) Delays requested for changes which do not affect the critical path.
 - (d) Delays caused by the failure of the Contractor to make submittals in a timely manner for review and acceptance by the Engineer, such as but not limited to shop drawings, descriptive sheets, material samples, and color samples except as covered in Subsection 108.05(B)(3) and 108.05(B)(4).
 - **(e)** Delays caused by the failure to submit sufficient information and data in a timely manner in the proper form in order to obtain necessary permits related to the work.
 - (f) Failure to follow the procedure within the time allowed by contract to request a time extension.
 - **(g)** Failure of the Contractor to provide evidence sufficient to support the time extension request.
- (7) Reduction in Time. If the State deletes or modifies any portion of the work, an appropriate reduction of contract time may be made in accordance with Subsection 104.02 Changes.

108.06 Progress Schedules.

(A) Forms of Schedule. All schedules shall be submitted using the specific computer program designated in the bid documents. If no such scheduling software program is designated, then all schedules shall be submitted using the latest version of Microsoft Project by Microsoft or approved equivalent software program.

Schedule submittals shall be as follows:

- (1) For Contracts \$2,000,000 or less or For Contract Time 100 Working Days or 140 Calendar Days or Less. For contracts of \$2,000,000 or less or for contract time of 100 working days or 140 calendar days or less, the progress schedule will be a Time Scaled Logic Diagram (TSLD). The Contractor shall submit a TSLD submittal package meeting the following requirements and having these essential and distinctive elements:
 - (a) The major features of work, such as but not limited to BMP installation, grubbing, roadway excavation, structure excavation, structure construction, shown in the chronological order in which the Contractor proposes to work that feature or work and its location on the project. The schedule shall account for normal inclement weather, unusual soil or other conditions that may influence the progress of the work, schedules, and coordination required by any utility, off or on site fabrications, and other pertinent factors that relate to progress;
 - (b) All features listed or not listed in the contract documents that the Contractor considers a controlling factor for the timely completion of the contract work.
 - (c) The time span and sequence of the activities or events for each feature, and its interrelationship and interdependencies in time and logic to other features in order to complete the project.
 - **(d)** The total anticipated time necessary to complete work required by the contract.
 - **(e)** A chronological listing of critical intermediate dates or time periods for features or milestones or phases that can affect timely completion of the project.
 - **(f)** Major activities related to the location on the project.

336	(g) Non-construction activities, such as submittal and
337	acceptance periods for shop drawings and material,
338	procurement, testing, fabrication, mobilization, and
339	demobilization or order dates of long lead material.
340	v
341	(h) Set schedule logic for out of sequence activities to
342	retain logic. In addition, open ends shall be non-critical.
343	
344	(i) Show target bars for all activities.
345	
346	(j) Vertical and horizontal sight lines both major and
347	minor shall be used as well as a separator line between
348	groups. The Engineer will determine frequency and style.
349	3 - 4
350	(k) The file name, print date, revision number, data and
351	project title and number shall be included in the title block.
352	, , ,
353	(I) Have columns with the appropriate data in them for
354	activity ID, description, original duration, remaining duration,
355	early start, early finish, total float, percent complete,
356	resources. The resource column shall list who is
357	responsible for the work to be done in the activity. These
358	columns shall be to the left of the bar chart.
359	
360	(2) For Contracts Which Have A Contract Amount More
361	Than \$2,000,000 Or Having A Contract Time Of More Than 100
362	Working Days Or 140 Calendar Days. For contracts which
363	have a contract amount more than \$2,000,000 or contract time of
364	more than 100 working days or 140 calendar days, the Contractor
365	shall submit a Timed-Scaled Logic Diagram (TSLD) meeting the
366	following requirements and having these essential and distinctive
367	elements:
368	
369	(a) The information and requirements listed in Subsection
370	108.06(A)(1) – For Contracts \$2,000 or Less or For Contract
371	Time 100 Working Days or 140 Calendar Days or Less.
372	,
373	(b) Additional reports and graphics available from the
374	software as requested by the Engineer.
375	
376	(c) Sufficient detail to allow at least weekly monitoring of
377	the Contractor and subcontractor's operations.
378	·
379	(d) The time scaled schematic shall be on a calendar or
380	working days basis. What will be used shall be determined
381	by how the contract keeps track of time. It will be the
382	same. Plot the critical calendar dates anticipated.

433	that the sequences or durations indicated are feasible.
434	
435	(D) Initial Progress Schedule. The Contractor shall submit an initial
436	progress schedule. The initial progress schedule shall consist of the
437	following:
438	
439	Four sets of the TSLD schedule.
440	
441	(2) All the software files and data to re-create the TSLD in a
442	computerized software format as specified by the Engineer.
443	
444	(3) A listing of equipment that is anticipated to be used on the
445	project. Including the type, size, make, year of manufacture,
446	and all information necessary to identify the equipment in the
447	Rental Rate Blue Book for Construction Equipment.
448	
449	(4) An anticipated manpower requirement graph plotting
450	contract time and total manpower requirement. This may be
451	superimposed over the payment graph.
452	
453	(5) A Method Statement that is a detailed narrative describing
454	the work to be done and the method by which the work shall be
455	accomplished for each major activity. A major activity is an
456	activity that:
457	,
458	(a) Has a duration longer than five days.
459	(a) made a descention gen unan mod dayon
460	(b) Is a milestone activity.
461	(a) is a missione dentity.
462	(c) Is a contract item that exceeds \$10,000 on the
463	contract cost proposal.
464	oomiaat oot proposan
465	(d) Is a critical path activity.
466	(a) To a chaodi path activity.
467	(e) Is an activity designated as such by the Engineer.
468	(b) To all dollylly designated de sach by the Engineer.
469	Each Method Statement shall include the following items
470	needed to fulfill the schedule:
471	riceded to failiff the schedule.
472	(a) Quantity, type, make, and model of equipment.
473	(a) Quantity, type, make, and model of equipment.
474	(b) The manpower to do the work, specifying worker
475	classification.
476	Classification.
477	(a) The production rate per eight hour day, or the working
477	(c) The production rate per eight hour day, or the working
478	hours established by the contract documents needed to meet the time indicated on the schedule. If the production
サ/フ	•
	ER-16(003)
	108-10a 10/01/17

480	rate is not for eight hours, the number of working hours shall
481	be indicated.
482	
483	(6) Two sets of color time-scaled project evaluation and review
484	technique charts ("PERT") using the activity box template of Logic –
485	Early Start or such other template designated by the Engineer.
486	
487	If the contract documents establish a sequence or order for the
488	work, the initial progress schedule shall conform to such sequence or
489	order.
490	
491	(E) Contractor's Continuing Schedule Submittal Requirements.
492	After the acceptance of the initial TSLD and when construction starts, the
493	Contractor shall submit four plotted progress schedules, two PERT
494	charts, and reports on all construction activities every two weeks (bi-
495	weekly). This scheduled bi-weekly submittal shall also include an
496	updated version of the project schedule in a computerized software format
497	as specified by the Engineer. The submittal shall have all the
498	information needed to re-create that time period's TSLD plot and reports.
499	The bi-weekly submittal shall include, but not limited to, an update of
500	activities based on actual durations, all new activities and any changes in
501	duration or start or finish dates of any activity.
502	duration of start of limstruates of any activity.
	The Contractor shall submit with even undeter in report forms
503	The Contractor shall submit with every update, in report form
504	acceptable to the Engineer, a list of changes to the progress schedule
505	since the previous schedule submittal. The Engineer may change the
506	frequency of the submittal requirements but may not require a submittal of
507	the schedule to be more than once a week. The Engineer may
508	decrease the frequency of the submittal of the bi-weekly schedule.
509	
510	The Contractor shall submit updates of the anticipated work
511	completion graph, equipment listing, manpower requirement graph or
512	method statement when requested by the Engineer. The Contractor
513	shall submit such updates within 4 calendar days from the date of the
514	request by the Engineer.
515	
516	The Engineer may withhold progress payment until the Contractor
517	is in compliance with all schedule update requirements
518	
519	(F) Float. All float appearing on a schedule is a shared commodity.
520	Float does not belong to or exist for the exclusive use or benefit of either
521	the State or the Contractor. The State or the Contractor has the
522	opportunity to use available float until it is depleted. Float has no
523	monetary value.
524	monotary value.
525	(G) Scheduled Meetings. The Contractor shall meet on a bi-weekly
526	basis with the Engineer to review the progress schedule. The
320	basis with the Engineer to review the progress schedule.

527 Contractor shall have someone attending the meeting that can answer all guestions on the TSLD and other schedule related submittals.

529 530

531

532533

534

535

536

537

538539

540

(H) Accelerated Schedule; Early Completion. If the Contractor submits an accelerated schedule (shorter than the contract time). Engineer's review and acceptance of an accelerated schedule does not constitute an agreement or obligation by the State to modify the contract time or completion date. The Contractor is solely responsible for and shall accept all risks and any delays, other than those that can be directly and solely attributable to the State, that may occur during the work, until the contract completion date. The contract time or completion date is established for the benefit of the State and cannot be changed without an appropriate change order or Substantial Completion granted by the State. The State may accept the work before the completion date is established, but is not obligated to do so.

541542543

544

545

546 547

548

If the TSLD indicates an early completion of the project, the Contractor shall, upon submittal of the schedule, cooperate with the Engineer in explaining how it will be achieved. In addition, the Contractor shall submit the above explanation in writing which shall include the State's part, if any, in achieving the early completion date. Early completion of the project shall not rely on changes to the Contract Documents unless approved by the Engineer.

549550551

552

553554

(I) Contractor Responsibilities. The Contractor shall promptly respond to any inquiries from the Engineer regarding any schedule submission. The Contractor shall adjust the schedule to address directives from the Engineer and shall resubmit the TSLD package to the Engineer until the Engineer finds it acceptable.

555556557

558

559560

561

The Contractor shall perform the work in accordance with the submitted TSLD. The Engineer may require the Contractor to provide additional work forces and equipment to bring the progress of the work into conformance with the TSLD at no increase in contract price or contract time whenever the Engineer determines that the progress of the work does not insure completion within the specified contract time.

565

566567

568

569

108.07 Weekly Meeting. In addition to the bi-weekly schedule meetings, the Contractor shall be available to meet once a week with the Engineer at the time and place as determined by the Engineer to discuss the work and its progress including but not limited to, the progress of the project, potential problems, coordination of work, submittals, erosion control reports, etc. The Contractor's personnel attending shall have the authority to make decisions and answer questions.

570571572

573

574

The Contractor shall bring to weekly meetings a detailed work schedule showing the next three weeks' work. Number of copies of the detailed work schedule to be submitted will be determined by the Engineer. The three-week

575 576	schedule is in addition to the TSLD and shall in no way be considered as a substitute for the TSLD or vice versa. The three-week schedule shall show:
577	
578	(a) All construction events, traffic control and BMP related activities in
579	such detail that the Engineer will be able to determine at what location and
580	type of work will be done for any day for the next three weeks. This is
581	for the State to use to plan its manpower requirements for that time period.
582	
583	(b) The duration of all events and delays.
584	
585	(c) The critical path clearly marked in red or marked in a manner that
586	makes it clearly distinguishable from other paths and is acceptable to the
587	Engineer.
588	
589	(d) Critical submittals and requests for information (RFI's).
590	
591	(e) The project title, project number, date created, period the schedule
592	covers, Contractor's name and creator of the schedule on each page.
593	
594	Two days prior to each weekly meeting, the Contractor shall
595	submit a list of outstanding submittals, RFIs and issues that require
596	discussion.
597	
598	108.08 Liquidated Damages for Failure to Complete the Work or Portions
599	of the Work on Time. The actual amount of damages resulting from the
600	Contractor's failure to complete the contract in a timely manner is difficult to
601	accurately determine. Therefore the amount of such damages shall be
602	liquidated damages as set forth herein and in the special provisions. The State
603	may, at its discretion, deduct the amount from monies due or that may become
604	due under the contract.
605	
606	When the Contractor fails to reach substantial completion of the work for
607	which liquidated damages are specified, within the time or times fixed in the
608	contract or any extension thereof, in addition to all other remedies for breach
609	that may be available to the State, the Contractor shall pay liquidated damages
610	to the State, in the amount of \$3,200 per working day.
611	
612	
613	(A) Liquidated Damages Upon Termination. If the State

(A) Liquidated Damages Upon Termination. If the State terminates on account of Contractor's default, liquidated damages may be charged against the defaulting Contractor and its surety until final completion of work.

 (B) Liquidated Damages for Failure to Complete the Punchlist. The Contractor shall complete the work on any punchlist created after the pre-final inspection, within the contract time or any extension thereof.

When the Contractor fails to complete the work on such punchlist within the contract time or any extension thereof, the Contractor shall pay liquidated damages to the State of 20 percent of the amount of liquidated damages established for failure to substantially complete the work within contract time. Liquidated damages shall not be assessed for the period between:

- (1) Notice from the Contractor that the project is substantially complete and the time the punchlist is delivered to the Contractor.
- (2) The date of the completion of punchlist as determined by the Engineer and the date of the successful final inspection, and
- (3) The date of the Final Inspection that results in Substantial Completion and the receipt by the Contractor of the written notice of Substantial Completion.
- (C) Actual Damages Recoverable If Liquidated Damages Deemed Unenforceable. In the event a court of competent jurisdiction holds that any liquidated damages assessed pursuant to this contract are unenforceable, the State will be entitled to recover its actual damages for Contractor's failure to complete the work, or any designated portion of the work within the time set by the contract.
- 108.09 Rental Fees for Unauthorized Lane Closure or Occupancy. In addition to all other remedies available to the State for Contractor's breach of the terms of the contract, the Engineer will assess the rental fees in the amount of \$500 for every one-to fifteen-minute increment for each roadway lane closed to public use or occupied beyond the time periods authorized in the contract or by the Engineer. The maximum amount assessed per day shall be \$5,000. The State may, at its discretion, deduct the amount from monies due or that may become due under the contract. The rental fee may be waived in whole or part if the Engineer determines that the unauthorized period of lane closure or occupancy was due to factors beyond the control of the Contractor. Equipment breakdown is not a cause to waive liquidated damages.

108.10 Suspension of Work.

- (A) Suspension of Work. The Engineer may, by written order, suspend the performance of the work, either in whole or in part, for such periods as the Engineer may deem necessary, for any cause, including but not limited to:
 - (1) Weather or soil conditions considered unsuitable for prosecution of the work.
 - (2) Whenever a redesign that may affect the work is deemed necessary by the Engineer.

- (3) Unacceptable noise or dust arising from the construction even if it does not violate any law or regulation.
- (4) Failure on the part of the Contractor to:
 - (a) Correct conditions unsafe for the general public or for the workers.
 - **(b)** Carry out orders given by the Engineer.
 - **(c)** Perform the work in strict compliance with the provisions of the contract.
 - **(d)** Provide adequate supervision on the jobsite.
- (5) The convenience of the State.
- (B) Partial and Total Suspension. Suspension of work on some but not all items of work shall be considered a "partial suspension". Suspension of work on all items shall be considered "total suspension". The period of suspension shall be computed from the date set out in the written order for work to cease until the date of the order for work to resume.
- (C) Reimbursement to Contractor. In the event that the Contractor is ordered by the Engineer in writing as provided herein to suspend all work under the contract for the reasons specified in Subsections 108.10(A)(2), 108.10(A)(3), or 108.10(A)(5) of the "Suspension of Work" paragraph, the Contractor may be reimbursed for actual direct costs incurred on work at the jobsite, as authorized in writing by the Engineer, including costs expended for the protection of the work. An allowance of 5 percent for indirect categories of delay costs will be paid on any reimbursed direct costs. including extended branch and home-office overhead and delay impact costs. No allowance will be made for anticipated profits. Payment for equipment which is ordered to standby during such suspension of work shall be made as described in Subsection 109.06(H) - Idle and Standby Equipment.
- (D) Cost Adjustment. If the performance of all or part of the work is suspended for reasons beyond the control of the Contractor except an adjustment shall be made for any increase in cost of performance of this contract (excluding profit) necessarily caused by such suspension, and the contract modified in writing accordingly.

However, no adjustment to the contract price shall be made for any suspension, delay, or interruption:

- (1) For weather related conditions.
- (2) To the extent that performance would have been so suspended, delayed, or interrupted by any other cause, including the fault or negligence of the Contractor.
- (3) Or, for which an adjustment is provided for or excluded under any other provision of this Contract.
- **(E)** Claims for Adjustment. Any adjustment in contract price made shall be determined in accordance with Subsections 104.02 Changes and 104.06 Methods of Price Adjustment.

Any claims for such compensation shall be filed in writing with the Engineer within 30 days after the date of the order to resume work or the claim will not be considered. The claim shall conform to the requirements of Subsection 107.15(D) – Making of a Claim. The Engineer will take the claim under consideration, may make such investigations as are deemed necessary and will be the sole judge as to the equitability of the claim. The Engineer's decision will be final.

(F) No Adjustment. No provision of this clause shall entitle the Contractor to any adjustments for delays due to failure of its surety, the cancellation or expiration of any insurance coverage required by the contract documents, for suspensions made at the request of the Contractor, for any delay required under the contract, for suspensions, either partial or whole, made by the Engineer under Subsection 108.10(A)(4) of the "Suspension of work" paragraph.

108.11 Termination of Contract for Cause.

(A) If the Contractor refuses or fails to perform the work, or any separable part thereof, with such diligence as will assure its completion within the time specified in this contract, or any extension thereof, or commits any other material breach of this contract, and further fails within seven days after receipt of written notice from the Engineer to commence and continue correction of the refusal or failure with diligence and promptness, the Engineer may, by written notice to the Contractor, declare the Contractor in breach and terminate the Contractor's right to proceed with the work or the part of the work as to which there has been delay or other breach of contract. In such event, the State may take over the work, perform the same to completion, by contract or otherwise, and may take possession of, and utilize in completing the work, the materials, appliances, and plants as may be on the site of the work and necessary therefore. Whether or not the Contractor's right to proceed with the work is terminated, the Contractor and the Contractor's sureties shall be liable for any damage to the State resulting from the Contractor's refusal or failure to complete the work within the specified time.

(B) Additional Rights and Remedies. The rights and remedies of the State provided in this contract are in addition to any other rights and remedies provided by law.

(C) Costs and Charges. All costs and charges incurred by the State, together with the cost of completing the work under contract, will be deducted from any monies due or which would or might have become due to the Contractor had it been allowed to complete the work under the contract. If such expense exceeds the sum which would have been payable under the contract, then the Contractor and the surety shall be liable and shall pay the State the amount of the excess.

In case of termination, the Engineer will limit any payment to the Contractor to the part of the contract satisfactorily completed at the time of termination. Payment will not be made until the work has satisfactorily been completed and all required documents, including the tax clearance required by Subsection 109.11 – Final Payment are submitted by the Contractor. Termination shall not relieve the Contractor or Surety from liability for liquidated damages.

(D) Erroneous Termination for Cause. If, after notice of termination of the Contractor's right to proceed under this section, it is determined for any reason that good cause did not exist to allow the State to terminate as provided herein, the rights and obligations of the parties shall be the same as, and the relief afforded the Contractor shall be limited to, the provisions contained in Subsection 108.12 – Termination for Convenience.

108.12 Termination For Convenience.

- (A) Terminations. The Director may, when the interests of the State so require, terminate this contract in whole or in part, for the convenience of the State. The Director will give written notice of the termination to the Contractor specifying the part of the contract terminated and when termination becomes effective.
- Contractor's Obligations. The Contractor shall incur no further (B) obligations in connection with the terminated work and on the date set in the notice of termination the Contractor shall stop work to the extent The Contractor shall also terminate outstanding orders and subcontracts as they relate to the terminated work. The Contractor shall settle the liabilities and claims arising out of the termination of subcontracts and orders connected with the terminated work subject to the The Engineer may direct the Contractor to assign the State's approval. Contractor's right, title, and interest under terminated orders or subcontracts to the State. The Contractor must still complete the work

955		ds the work is substantially comp	•		
956	that must be	e corrected before the work is read	y for final inspection, the		
		ER-16(003)	<u>-</u>		
		108- 2 0a ´	10/01/17		

Engineer will prepare in writing and deliver to the Contractor a punchlist describing such deficiencies.

At any time before final acceptance, the Engineer may revoke the determination of substantial completion if the Engineer finds that it was not warranted and will notify the Contractor in writing the reasons therefore together with a description of the deficiencies negating the declaration.

When the date of substantial completion has been determined by the State, liquidated damages for the failure to complete the punchlist, if due to the State will be assessed in pursuant to Subsection 108.08(B) - Liquidated Damages for Failure to Complete the Punchlist.

(D) Punchlist; Clean Up and Final Inspection. Upon receiving a punchlist after pre-final inspection, the Contractor shall promptly devote all required time, labor, equipment, materials and incidentals to correct and remedy all punchlist deficiencies. The Engineer may add to or otherwise modify this punchlist until substantial completion of the project.

Before final inspection of the work, the Contractor shall clean all ground occupied by the Contractor in connection with the work of all rubbish, excess materials, temporary structures and equipment, shall remove all graffiti and defacement of the work and all parts of the work and the worksite must be left in a neat and presentable condition to the satisfaction of the Engineer.

Final inspection will occur within ten working days after the Contractor notifies the Engineer in writing that all punchlist deficiencies remaining after the pre-final inspection have been completed and the Engineer concurs. If the Engineer determines that deficiencies still remain at the final inspection, the work will not be accepted and the Engineer will notify the Contractor, in writing, of the deficiencies which shall be corrected and the steps above repeated.

If the Contractor fails to correct the deficiencies and complete the work by the established or agreed date, the State may correct the deficiencies by whatever method it deems appropriate and deduct the cost from any payments due the Contractor.

108.14 Substantial Completion and Final Acceptance.

(A) Substantial Completion. When the Engineer finds that the Contractor has satisfactorily completed all work for the project in compliance with the contract, with the exception of the planting period and the plant establishment period, the Engineer will notify the Contractor, in writing, of the project's substantial completion, effective as of the date of the final inspection. The substantial completion date shall determine end

of contract time and relieve contractor of any additional accumulation of liquidated damages for failure to complete the punchlist.

(B) Final Acceptance. When the Engineer finds that the Contractor has satisfactorily completed all contract work in compliance with the contract including all plant establishment requirements, and all the materials have been accepted by the State, the Engineer will issue a Final Acceptance Letter. The Final Acceptance date shall determine the commencement of all guaranty periods subject to Subsection 108.16 – Contractor's Responsibility for Work; Risk of Loss or Damage.

108.15 Use of Structure or Improvement. The State has the right to use the structure, equipment, improvement, or any part thereof, at any time after it is considered by the Engineer as available. In the event that the structure, equipment or any part thereof is used by the State before final acceptance, the Contractor is not relieved of its responsibility to protect and preserve all the work until final acceptance.

108.16 Contractor's Responsibility for Work; Risk of Loss or Damage. Until the written notice of final acceptance has been received, the Contractor shall take every precaution against loss or damage to any part of the work by the action of the elements or from any other cause whatsoever, whether arising from the performance or from the non-performance of the work. The Contractor shall rebuild, repair, restore and make good all loss or damage to any portion of the work resulting from any cause before its receipt of the written notice of final acceptance and shall bear the risk and expense thereof.

The risk of loss or damage to the work from any hazard or occurrence that may or may not be covered by a builder's risk policy is that of the Contractor and Surety, unless such risk of loss is placed elsewhere by express language in the contract documents.

108.17 Guarantee of Work.

(1) Regardless of, and in addition to, any manufacturers' warranties, all work and equipment shall be guaranteed by the Contractor against defects in materials, equipment or workmanship for one year from the date of final acceptance or as otherwise specified in the contract documents.

(2) When the Engineer determines that repairs or replacements of any guaranteed work and equipment is necessary due to materials, equipment, or workmanship which are inferior, defective, or not in accordance with the terms of the contract, the Contractor shall, at no increase in contract price or contract time, and within five working days of receipt of written notice from the State, commence to all of the following:

1051 1052		(a) Correct all noted defects and make replacements, as directed by the Engineer, in the equipment and work.			
1052		unected by the Engineer, in the equipment and work.			
1053		(b) Repair or replace to new or pre-existing condition any			
1054					
1055		damages resulting from such defective materials, equipment or installation thereof.			
1056		installation thereor.			
1057	(2)	The State will be entitled to the benefit of all manufacturers and			
	(3)	The State will be entitled to the benefit of all manufacturers and			
1059 1060	installers warranties that extend beyond the terms of the Contractor's				
1061	guaranty regardless of whether or not such extended warranty is required				
1061	by the contract documents. The Contractor shall prepare and submit all				
1062	documents required by the providers of such warranties to make them				
1064	effective, and submit copies of such documents to the Engineer. If an available extended warranty cannot be transferred or assigned to the				
1065					
1065	State as the ultimate user, the Contractor shall notify the Engineer who may direct that the warranted items be acquired in the name of the State				
1067	as purchaser.				
1067	as p	ui Gilasci.			
1068	(4)	If a defect is discovered during a guarantee period, all repairs and			
1009	\ <i>'</i>	ections to the defective items when corrected shall be guaranteed for			
1070	a new duration equal to the original full guarantee period. The running				
1071	of the guarantee period shall be suspended for all other work affected by				
1072	any defect. The guarantee period for all other work affected by any such				
1073	defect shall restart for its remaining duration upon confirmation by the				
1075	Engineer that the deficiencies have been repaired or remedied.				
1076	Liigi	most that the deficiences have been repaired of ferricaled.			
1077	(5)	Nothing in this section is intended to limit or affect the State's rights			
1078	and remedies arising from the discovery of latent defects in the work after				
1079		expiration of any guarantee period.			
1080		mphanon of any guarantee peneur			
1081	108.18 N	lo Waiver of Legal Rights. The following will not operate or be			
1082		as a waiver of any portion of the contract, or any power herein			
1083	reserved, o	r any right to damages provided herein or by law:
