

1 **SECTION 203 – EXCAVATION AND EMBANKMENT**

2
3 Make the following amendments to said Section:

4
5 **(I)** Amend **203.03(C)(2)(a) – Maximum Dry Unit Weight** from line 245 to line
6 255 to read as follows:

7
8 **“(a) Maximum Dry Unit Weight.** Test for maximum dry
9 unit weight according to AASHTO T 180, and apply the
10 correction for fraction larger than 3/4 inch. Use Hawaii
11 Test Method HDOT TM 5 for sample preparation of sensitive
12 soils when so designated by the Engineer.”

13
14 **(II)** Amend **203.04 – Measurement** by revising lines 345 to 366 to read as
15 follows:

16
17 **“203.04 Measurement.**

18
19 **(A)** The Engineer will measure roadway excavation per cubic yard.
20 The Engineer will compute quantities of roadway excavation by average
21 end area method and centerline distances. Curvature correction will not
22 be applied to quantities within roadway prism, as indicated in the contract
23 documents. In computing excavation quantities from outside the roadway
24 prism, where roadway centerline is used as a base, curvature correction
25 will be applied when centerline radius is 1,000 feet or less.

26
27 When roadway excavation quantities by average end area method
28 cannot be computed due to the nature of a particular operation or changed
29 conditions, the Engineer will determine and use computation method that
30 will produce an accurate quantity estimate.

31
32 **(B)** The Engineer will measure imported borrow for Ditch Backfill per
33 cubic yard. The Engineer will compute quantities of imported borrow for
34 ditch backfill incorporated into the work on a volume basis, using average
35 end area method in place at work site.

36
37 **(III)** Amend **203.05 – Payment** by revising lines 368 to 457 to read as follows:

38
39 **“203.05 Payment.** The Engineer will pay for the accepted pay items listed
40 below at the contract price per pay unit, as shown in the proposal schedule.
41 Payment will be full compensation for the work prescribed in this section and the
42 contract documents.

43
44 The Engineer will pay for each of the following pay items when included in
45 the proposal schedule:

47	Pay Item	Pay Unit
48		
49	(A) Roadway Excavation	Cubic Yard
50		
51	The Engineer will pay for:	
52		
53	(1) 15 percent of the contract bid price upon completion of	
54	obliterating old roadways and hauling.	
55		
56	(2) 30 percent of the contract bid price upon completion of	
57	preparing subgrade.	
58		
59	(3) 40 percent of the contract bid price upon completion of placing	
60	selected material in final position, rounding of slopes, and using water	
61	for compaction.	
62		
63	(4) 15 percent of the contract bid price upon completion of	
64	disposing of surplus excavation material.	
65		
66	(B) Ditch Backfill	Cubic yard
67		
68	The Engineer will pay for accepted quantities of subexcavation, as	
69	roadway excavation at the contract unit price per cubic yard, when ordered by	
70	the Engineer, for work prescribed in Subsection 203.03(A)(4) – Subexcavation.	
71	Payment will be full compensation for the work prescribed therein and in the	
72	contract documents.	
73		
74	The Engineer will not pay for stockpiling selected material, placing	
75	selected material in final position, or placing selected material in windrows along	
76	tops of roadway slopes for erosion control work, separately and will consider the	
77	cost as included in the unit prices for the various excavation contract pay items.	
78	The cost is for work prescribed in this section and the contract documents.	
79		
80	The Engineer will not pay for overhaul separately and will consider the	
81	cost as included in the unit prices for the various excavation contract pay items.	
82	The cost is for work prescribed in this section and the contract documents.	
83		
84	The Engineer will not pay for embankment separately and will consider the	
85	cost as included in the unit price for roadway excavation. The cost is for work	
86	prescribed in this section and the contract documents.”	
87		
88		
89		
90	END OF SECTION 203
