## INSTRUCTIONS FOR PREPARING AND TRANSMITTING FORM FHWA-47

## GENERAL REQUIREMENTS

Form FHWA-47 should be transmitted for each Federal-aid primary, urban and Interstate system project involving construction performed under contract awarded by competitive bidding, except projects for which the total final construction cost of roadway and bridge is less than \$1,000,000 or projects consisting primarily of (1) the installation of protective devices at railroad grade crossings, or (2) highway beautification.

Form FHWA-47 should be transmitted with or, if data is already available, in advance of the Final Report required by Federal Aid Highway Program Manual Vol. 6; CH. 4; Sec. 2; Sub. Sec 8.

A separate form should be transmitted for each contract except that data for two or more contracts on the same project may be combined when such contracts are completed at approximately the same time. In case of a combination, the earliest starting date and the latest completion date should be reported. Where a single contract covers more than one project, one form may be prepared for each project or for the entire contract, provided none of the data are duplicated. A Form FHWA47 should not be prepared for a contract covering only the purchase of material but the quantity of material should be reported when subsequently included in a construction project. In all cases, only the original of Form FHWA-47, typed or clearly leftered, and no carbon or photocopies should be transmitted to the Washington Office.

If nonparticipating work is included in the contract, all data should be combined with the Federal-aid data in preparing the form. Data for any subcontract must be combined by the State or the division office with the prime contract if not so combined by the prime contract or. It will be the State's responsibility to see that all prime contract and subcontract costs, material, and labor-hours have been reported for each contract, and no duplication OS data are involved. Quantities of State-furnished materials should be included with contract quantities, and costs of STATE furnished materials should be added to Item 2 "Final Construction Cost" and also to Item 4 "Total Cost OS All Materials and Supplies." All quantities should be reported to the nearest whole unit and only in the units specified. All costs should be reported to the nearest whole unit and only in the units specified. All costs should be reported to the nearest whole unit and only in the units specified. All costs should be reported to the nearest dollar.

Check urban or rural to indicate whether the major cost is for work within an urban area or in a rural location.

All figures should be verified for reasonableness by State highway department and Federal Highway Administration division office engineers. The total material cost and the total labor hours and gross earnings should bear reasonable relationships to the final construction cost. Also the quantity of each material reported should be reasonable with respect to the size and nature of the contract and with respect to the quantities of other materials. For example, is a large quantity of reinforcing steel is reported with no cement or ready-mixed concrete, an error of omission in reporting would be indicated.

Generally, the total cost of materials, supplies, and labor should be substantially less than the final construction cost, as the latter also includes costs of equipment ownership, overthead, and profit which are not required to be reported. If the final construction costs is less or only a few percent more than the total cost of materials, supplies and labor, the indication is that the contractor suffered a loss on the project or that there is an error in reporting. In such case, if it is determined that the figures reported are of paper marked "Remarks" to the effect that the contractor actually did suffer a loss, (verify with contractor). contractor).

## PART A - INFORMATION TO BE SUPPLIED BY FEDERAL HIGHWAY ADMINISTRATION OR STATE HIGHWAY PERSONNEL (FEDERAL-AID HIGHWAY PROGRAM, VOL. 6: CH. 1; SECT. 1; SUB. SECT. 1)

Item 1- "Length of Project." - Report official roadway mileage and official bridge mileage.

**Item 2-** "Final Construction Cost"- Show best estimate of Federal and State costs incurred to date for contracting items, extra work performed by contractor, and State furnished materials.

## PART B - INFORMATION TO BE SUPPLIED BY CONTRACTOR IMMEDIATELY UPON COMPLETION OF CONTRACT OR PROJECT

PART B - INFORMATION TO BE SUPPLIED BY CONTRACTOR IMMEDIATELY UPON COMPLETION OF CONTRACTOR PROJECT

Specific Instructions for the Following Numbered Items: Items 3 - Report total labor-hours worked and earnings of all contractor's employees on the project, including those on operation and maintenance of equipment Item 4 - This should be the total cost, at the jobsite, of all construction materials and supplies purchased for and used on the project, including the cost of materials tan supplies purchased for and used on the project, including the cost of materials and supplies not specifically listed hereon. Costs of equipment or equipment frental and the cost of operating the equipment, except the costs of tuel and lubricants, should not be included in this Item. Small items of equipment such as jackhammers, hand tools, repair parts, fires, etc., are not considered to be supplies. Costs of such litems and also overhead costs should not be included. The amount included here for aggregates produced should be only the cost paid by the contractor for the aggregates and should not include the costs of excavating, processing loading and hauling. Wages and labor hours for aggregates produced should of course, be included with Item 3. Item 5 - Report tofal number of gallons OS all gasoline, diesel oil, lubricating oil, and grease for equipment and trucks. For conversion purposes use factor of 8 pounds of grease per gallon.

Items 6 and 7 - Report quantity of cament used on project. Do not report here the cement included in Item 14.

Item 8 and 9 - Report quantity of aggregates purchased from commercial producers, such as sand, gravel, crushed stone, etc. Do not report here aggregates included in Items 14 and 15. Aggregates produced by the contractor shall be reported as Items 14 and 17 - Report all lumber products purchased for and used on the project, including plywood and pressed wood, but excluding limber piling, lumber in lencing, guardrail, and signs, and lumber purchased for or used on previous projects and previ

signals.\*
Item 25 -Report, by size, regardless of class, type gauge or coating, number of linear feet of corrugated steel pipe, structural plate pipe, pipe-arches and

steer pipe, stresses and concrete.

Item 26 -Report, by size regardless of class, type, gauge or coating, total number of linear feet of plain and reinforced concrete drain and culvert pipe.

Item 27 -Report, by size, total number of linear feet of plain and culvert pipe.

Item 27 - Report, by size, total number of linear feet of clay pipe.

Item 28 - Report, by size, total number of linear feet of corrugated aluminum culvert.

Item 27 - Report, by size, total number of linear feet of plastic pipe.

ORM FHWA-47 (Rev. 6-90 U.S.GPO:1990-0-261-335/16519

<sup>\*</sup> Quantities of steet, concrete and lumber used in connection with items 19, 29, 21, 22, 23, and 24 should not be reported unless difficulties are encountered in segregating such quantities from total quantities.
