

1 Make the following Section part of the Standard Specifications:

2
3 **SECTION 697 – ARCHAEOLOGICAL MONITORING**
4
5

6 **697.01 Description.**
7

8 In order to address the possibility that historic sites may be
9 encountered during construction, the Contractor shall retain an
10 Archaeological Monitor from SHPD approved list, who shall be present
11 during all ground-disturbing activities. The Archaeological Monitor's
12 services shall include implementing all incidental procedures and
13 providing all equipment necessary for compliance with the requirements of
14 the archaeological monitoring plan.
15

16 **697.02 Materials.** None Specified.
17

18 **697.03 Construction**
19

20 **(A) Archaeological Monitoring.** The archeological Monitor shall
21 submit a monitoring plan to SHPD and the Engineer for review and
22 approval prior to any ground-disturbing activities. The
23 Archaeological Monitor shall:
24

- 25 (1) Implement and adhere to the approved monitoring
26 plan;
- 27 (2) Identify, document, record and provide appropriate
28 mitigation measures, as necessary, for any significant
29 historic sites that may be encountered;
- 30 (3) Ensure that all construction activities are performed in
31 accordance with applicable State regulations.
32

33 The Archeological Monitor shall be responsible for the incidental
34 procedures and equipment required for full compliance with all
35 requirements of the provisions for archaeological monitoring as
36 outlined in the monitoring plan.
37

38 The Archeological Monitor shall establish the limits of any
39 significant historical site encountered, and shall determine with the
40 Engineer the best means for protecting the site from further
41 disturbance, as well as the best means for implementing further
42 investigation or salvage as required by SHPD. Protection measures
43 may include barricades, roping off, temporary fencing or other
44 means.
45

The Archaeological Monitor shall also submit a report documenting the findings of the monitoring activities to SHPD for review within 180 calendar days of the completion of the project.

(B) Archaeological, Historical or Burial Site Findings. The Contractor shall be responsible for complying with the requirements of this section as well as the requirements for protection of archaeological, historical and burial sites as specified in Section 107 – Legal Relations and Responsibility to Public, and as specified elsewhere in the plans and specifications.

Whenever the Contractor encounters possible archaeological, historical or burial site findings, the Contractor shall immediately suspend the operation and inform the Engineer verbally and in writing. The Engineer will contact the DLNR and other agencies to evaluate such findings and determine the appropriate course of action.

The Contractor shall not resume operations without the prior written approval of the Engineer. The Contractor shall not count delays resulting from the discovery, investigation and handling of such findings against the completion date. The Engineer will govern suspensions of work according to Subsection 108.10 – Suspension of Work. Also, the Contractor shall conform to the requirements of Chapter 6E, Hawaii Revised Statutes (HRS).

Failure or refusal to comply with the terms of this Section or Chapter 6E, Hawaii Revised Statutes, may subject the Contractor to the penalties described in Section 6E-11, Hawaii Revised Statutes:

- (1) a fine or not more than ten thousand (\$10,000) dollars for each separate offense,
- (2) seizure and disposition of equipment, and
- (3) if the Contractor knowingly fails or refuses to comply, a prohibition from participating in the construction of State or County projects for ten (10) years.

Construction work and equipment shall remain within the right-of-way limits of this project.

697.04 Measurement. The Engineer will measure “Archaeological Monitoring” on a force account basis according to Subsection 109.06 – Force Account Provisions and Compensation and as ordered by the Engineer.

697.05 Payment. The Engineer will pay for accepted Archaeological Monitoring on a force account basis according to Subsection 109.06 – Force

Account Provisions and Compensation. An estimated amount for the force account is allocated in the proposal schedule under "Archaeological Monitoring". The actual amount to be paid will be the sum shown on the accepted force account records whether this sum be more or less than the estimated amount allocated in the proposal schedule.

Payment will be full compensation for the work prescribed in this Section, by the Engineer, and in the contract documents.

Pay Item	Pay Unit
Archaeological Monitoring	Force Account

A listing of Individuals and Organizations Engaging in Archaeological Consultant Work in the State of Hawaii approved by SHPD is included in this Section."
